

# Treasury. Run by AI.

AI-powered applications that work on your SAP data. Live with customers today, not on a roadmap.

## TreasuryCentral

THE UNIVERSAL INTERFACE

The single screen treasury works in: cash, investments, debt, FX, market news and governance, on your SAP data. One cockpit over everything below it.

RUNS ON ▼

## OnePilot

THE AI LAYER

Autonomous agents operate everything underneath, governed. You set the rules and approve the exceptions; OnePilot flies the operation.

ORCHESTRATES ▼

## The applications

WHAT ONEPILOT RUNS

### Market Data Hub

Market data into SAP, governed: Bloomberg, Refinitiv, CME, 360T, Deutsche Borse, OANDA.

### Brisken Smart Trading

Trade automation on your SAP data: the deal lifecycle into SAP TRM and FAM.

### Remittance Advice Gate

AI reads the messy remittance emails and posts them into SAP S/4HANA.

SITS ON YOUR ▼

## SAP data

YOUR SYSTEMS OF RECORD

The applications and data it all sits on, in and out of SAP with a full audit trail on every action.

### THE MANUAL WORK IT REMOVES

- ◆ Hand-keyed market-data uploads
- ◆ Manual trade capture and deal creation in SAP
- ◆ Retyping remittance emails into S/4HANA
- ◆ Fragile, unowned scripts moving data into SAP

### LIVE TODAY, NOT ON A ROADMAP

**Agricultural-sector customer:** remittances posted into S/4HANA on a governed AI gate.

**Financial-services group:** one OnePilot deployment governs several data domains on S/4HANA Public Cloud.

### BUILT FOR TRUST

SAP Co-Innovation Partner

SAP PartnerEdge

SAP Industry Cloud, FS & Commodities

Listed on the SAP Store

ISO 27001

SOC 1 Type II

## See it live at Booth 2

A fifteen-minute demo maps OnePilot onto your actual data flow into SAP. No preparation needed.
